

Gray Plant Mooty Congratulates Andas Inc, Minnesota Cup 2014 Life Science/Health IT Division Winner

August 29, 2014

Gray Plant Mooty is excited to congratulate our client Andas Inc. for receiving first place in the Minnesota Cup Life Science/Health IT division. A spin-off company from the University of Minnesota, Andas Inc. is currently developing technology that integrates breathalyzers into smartphones with an accompanying device. Their division win allows them to move forward to the Minnesota Cup finals in early September.

The Minnesota Cup is an annual competition focused on new Minnesota-based business concepts and innovative ideas. Since its inception in 2005, the Minnesota Cup has grown to become the largest statewide new venture competition in the US. This year's competition included seven divisions: Energy/Clean Tech/Water, General, High Tech, Life Science/Health IT, Social, Student, and Food/Agriculture/Beverage.

In our seventh year of sponsoring the Minnesota Cup, Gray Plant Mooty is again proud to be a division sponsor.
