# Lathrop GPM LLP Partner Receives Recognition for Life Sciences and Healthcare Work from Massachusetts Lawyers Weekly

08/22/2024 | 2 minute read

Brian C. Trinque, Ph.D. named in Massachusetts Lawyers Weekly's Go To Lawyers

**BOSTON (August 22, 2024)** — Lathrop GPM LLP proudly announces that Partner [Brian C. Trinque, Ph.D.](#) has been named in Massachusetts Lawyers Weekly's list of Massachusetts Go To Lawyers: Life Sciences/Healthcare 2024.

Massachusetts Go To Lawyers debuted in 2020 to showcase leaders in the Massachusetts legal community by practice area. Selected attorneys are nominated by their colleagues and chosen by a panel from Lawyers Weekly.

Trinque has been advising clients in the pharmaceutical industry on patent evaluation and strategy for over 20 years. He works regularly with multinational pharmaceutical corporations, mid-size companies, early-stage operations and universities to identify patentable subject matter, prepare patent applications covering those developments and prosecute those applications worldwide to create assets critical for the protection of commercial efforts. He leads Lathrop GPM's Chemical and Pharmaceutical Patent Prosecution Practice, where he plays a vital role in supporting innovation, promoting business growth and fostering intellectual property protection.

"I am honored to be included among such an esteemed group of legal professionals working in the life sciences and healthcare space," said Trinque. "Pharmaceutical and chemical innovation impacts the lives of so many, and protecting intellectual property in this industry is essential to the progress and advancements that lead to better quality of life for all. I am grateful to be recognized for this important work."

Trinque is a trained organic chemist with extensive experience prosecuting and assessing patent portfolios in all aspects of the chemical arts, including small molecules and biologics. This experience includes developing patent strategies from discovery to commercialization. In addition to his pharmaceutical expertise, he has experience in non-life science chemistries, including polymers, materials science, process chemistry, electronic displays, fuel cell technology, biofuels, nutraceuticals and food products.
