Nonprofits continue to face intense challenges, including fluctuating markets, a tight job market, uncertainty relating to the COVID-19 pandemic, and demands from the public that nonprofits do more to face the immediate needs of the diverse communities they serve. Many nonprofit leaders wonder how they can use their restricted and endowed gifts to confront these challenges, while respecting donors' desire for greater involvement in and control over the use of their gifts.

Join Lathrop GPM lawyers Sheryl Morrison, Greg Larson and Wade Hauser for a webinar discussing charitable gift restrictions. They will cover legal and practical issues surrounding:

- How can nonprofits realize the greatest flexibility to deploy funds to respond to changing missions and needs?
- How can charities' and donors' intentions regarding gifts be clarified and aligned?

How can restrictions be adapted to changing times and circumstances so that the charitable mission and donor intent are best served?

1-hour of CLE credit has been applied for in Minnesota and Missouri.
