

Doug Ramler Serves as Startup Law Expert for Project Skyway

June 13, 2011

Doug Ramler, cochair of Gray Plant Mooty's Entrepreneurial Services group, recently served as a startup law expert for Project Skyway—a tech accelerator program that is committed to improving early-stage technology companies by providing them mentorship, seed capital, and a home in Minnesota for their company. Project Skyway held its inaugural startup boot camp for 25 startup technology companies vying to become one of ten ventures selected to participate in the program. Over a five-hour session, Ramler answered questions from most of the more than 50 entrepreneurs in attendance and gave advice about legal matters crucial to launching new ventures. Visit the Project Skyway Web site for more information.
