

# Lathrop GPM Appoints Adam Yantorni Chief Information Officer

September 26, 2022

DENVER (Sept. 26, 2022) — Lathrop GPM today announced the promotion of Adam Yantorni to Chief Information Officer. Yantorni led the firm's transition to a virtual/hybrid workplace during the COVID-19 pandemic and has served as Interim Chief Information Officer since March 2022.

A 17-year veteran in the field of law firm information technology management, Yantorni joined the firm in 2011 as part of a combination with a Denver-based law firm. He has held several roles within the firm's Technology Services Department and was integral to preparing the firm's IT infrastructure for the combination between Lathrop Gage and Gray Plant Mooty in 2020.

"In the time Adam has served as our interim CIO, he has done a tremendous job leading the Technology Services Department to focus on the work that will help advance the firm's technology blueprint, for both the near and long-term," said Courtney Landon, Chief Operating Officer. "We are grateful for the leadership Adam has shown during his tenure and look forward to what he will accomplish in this new role."

Yantorni will be responsible for operational, security and infrastructure technology improvements and facilitating integration across practice groups and administrative departments. He played a strategic role in Lathrop GPM's COVID-19 technology response, which included outfitting the entire firm with new equipment to ensure lawyers and administrative professionals alike had the tools they needed to work effectively in a hybrid environment. Yantorni will also play an integral part in the firm's plan to transition all of its offices to a flexible, hoteling model over the next few years - a shift led by the opening of a new Denver office in September 2022, to be followed by a new office in Minneapolis late 2023/early 2024.

Yantorni holds a M.S. degree in Technology Management from the University of Denver and a B.S. degree in Computer Science from North Central College. He will be based out of the firm's Denver office.
